DETAILED ACTION

In light of the applicant's arguments filed in the Appeal Brief of 14 February 2005, all outstanding rejections are withdrawn and prosecution is reopened.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

1. Claims 1-24 are allowed.

Claim 1 is limited to a method of impedance matching voice and data signals received by an apparatus. In the Final Rejection filed 12 May 2004, the examiner rejected claim 1 as being unpatentable over Williamson et al. (US Patent 6,477,249) in view of Hendricks et al. (US Patent 6,625,278) and further in view of Frantz et al. (US Patent 5,802,169). In light of the applicant's arguments made on pages 19 and 20 of the Appeal Brief, this rejection is withdrawn.

In particular, Hendricks simply does not disclose a second preselected impedance value as recited in claim 1. At most, Hendricks teaches the first preselected impedance value (170), illustrated in figure 1, and the *third preselected impedance* value formed by the combination of digital filter (110) and the controlled current source (160). Thus, claim 1 is allowable over the cited prior art.

Claims 8, 15, 19 and 24 all recite the first and second preselected impedance values as well as the third value, and as such, are allowable over the cited prior art for at least the same reasons as claim 1.

Art Unit: 2646

Claims 2-7, 9-14, 16-18 and 20-23 depend variously from claims 1, 8, 15, 19 and 24, and are allowable over the cited prior art for at least the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
